

DITA LANCIER ADVANCED LENS TECHNOLOGY

DITA LANCIER USES LENS MATERIAL WITH CLARITY BEING ALMOST THAT OF GLASS LENS WHILE BEING ULTRA-LIGHT WEIGHT.

HYDROPHOBIC • OLEOPHOBIC • AR COATING

Land-Lens.

Great for driving, running, and cycling.

Contrasts red, green and yellows. Features custom polarization efficiency that does not interfere with the clarity of LCD screen.

Sea-Lens.

Great for sailing, fishing, and beach activities.

Contrasts reds and skin tones from blue backgrounds of the ocean and sky. Maximum polarization to reduce the glare of the ocean and water environments.

Air-Lens.

Great for flying, skiing, and hand& ball-striking sports.

For high-altitude, open-air environments, and activities that require more clarity. Contrast reds from the blue and green backgrounds. Feature no polarization for maximum contrast.

Optical-Ready

Without compromising quality, DITA-Lancier RX gives you the benefit of the same advanced lenses with optical correction adapted to your vision.
